A penny for your thoughts!

This is due tomorrow.

We have been trying to figure out what to do with the pilot project elements, period of performance, and milestones. We don't have anything from Jeff but he said that he will try to give us a cost estimate by the end of this week or Monday. He does not have work plan (he is still working in Garfield). So, there are no potential dates for anything.

Mel helped me out with the schedule: Phase 1 - field work complete in a year. Phase 2 - field work complete in a 1 1/2 year, Risk Assessment 2-3 months, FS close to a year for a period of performance with a magic number of 3 1/2 years - complete. I hope Jeff will be able to give us the cost estimate soon or we will have to use the ball park # he came up when we met him in Garfield (\$300K) I'll go over the RI guidance to see if I can get any ideas. LaPadula is under the

impression that we can get the work plan/costs from Jeff + see his message below.

Please review the attached "rough draft" of the Cabo Rojo factsheet and compare it to the Ellenville factsheet (below).

Let me know if you have any ideas. We can meet early morning on Monday, so we can have a fact sheet ready to be sent to LaPadula on March 1st (Tuesday)

Soon HQ will put out a memo requesting nominations for additional pilots under the "managing site to completion" initiative. We will need to provide a summary of the work for Caba Rojo we would like considered as part of the national pilot effort. Attached is a summary of a different type of pilot for Ellenville Scrap Iron for RD and RA work. Pls use the first attachment to this email as a guide in developing a comparable one for submitting to HQ for accelerating the RI field work and in-house risk assessment for Caba Rojo. Also, we will need to estimate the total cost for this effort. Can you pls use the estimate that ERT has prepared and let Courtney know what the amount is? In addition, if ERT has a work plan that Jeff gave to his contractor, pls provide a copy to Courtney who will try to develop a cost and schedule if we were going to have a RACS contractor or the ACE do this same work. Pls try to complete by March 1. Thanks very much.
